POPEYES: Lauren Lee, Ian Jiang, Vivian Teo

softdev p00 : wiki 2022-10-27

time spent: 0.5 hr

target ship date:2022-11-04

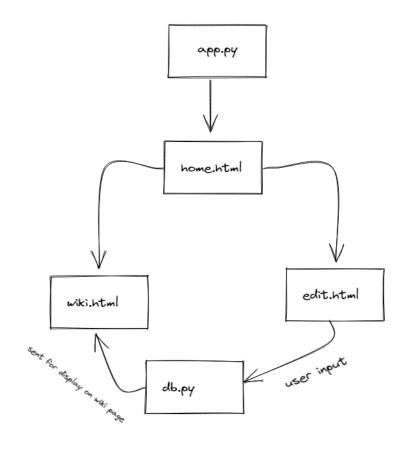

## Project Components & Roles:

A list of program components with role of each specified. (e.g., a car engine is comprised of various components

- app.py flask, define routes of pages
- templates
  - wiki.html wiki information
  - o home.html home page
  - o edit.html edit wiki form page
- db.py SQLite3, holds the information to be put on webpage

#### How each component relates to the other:

app.py will host the webpage locally. The specified routes in app.py will lead to different pages on the wiki. Each wiki page follows one of the templates. Users can input form responses to edit.html which sends the information to the database via running db.py

# Database Organization:

id | page title | content | last edited

## Site map for front end:

- /
- home page home.html
- o hyperlinks to edit page → /edit
- $\circ$  hyperlinks to different wiki pages  $\rightarrow$  /wiki/page\_title
- /edit
  - o Form submission edit.html
  - $\circ$  Based on which page the user edited  $\rightarrow$  /wiki/page\_title
- /wiki/page title
  - o wiki.html
  - o hyperlink to edit page → /edit
  - o hyperlink to home page → /home

### Breakdown of tasks & member assignment:

- 1. edit.html + db.py
  - a. Lauren Lee
- 2.app.py
  - a. Ian Jiang
- 3. home.html + placeholder info
  - a. Vivian Teo

-
